

AWIN Rescind Talkgroup Access

Required Outcome(s):

Talkgroup owners will have a way to rescind talkgroup usage from users they had previously given permission to use the talkgroup.

Definitions:

- **Talkgroup:** A uniquely named group of radios that can share calls and messages. A talkgroup's normal communications do not require interfacing with other talkgroups. Typically, the majority of the radio user's communications are within a select few talkgroups. Talkgroups do not enhance interoperability, they create silos of communication.

Standard:

A talkgroup owner will have a method to rescind talkgroup usage from other users.

- The talkgroup owner wishes to rescind usage of their talkgroup granted to other users.
 - Talkgroup owner sends formal request to AWIN Operations.
 - This can be via email, letter or fax.
 - Request must be on letterhead and signed by talkgroup owner.
 - Request must include the list of users that will no longer have usage of their talkgroup.
 - Talkgroup owner includes reason for rescinding the talkgroup
 - Valid reasons – not a complete list
 - Too much usage by the agency
 - Usage is driving up their baseline
 - Usage is no longer beneficial
- AWIN Operations will inform the other user that their talkgroup usage is being rescinded.
 - AWIN Operations sends a formal letter on letterhead to the user
 - AWIN Operations gives the user 45 days to have their radios reprogrammed
 - AWIN Operations may inhibit the users radios if they do not comply

Supporting Documents and Information:

The formal request will include

- The other user name and contact information
- The number of radios that have the talkgroup (if known)
- Valid reason for rescinding the usage of the talkgroup
